

ATMs at Festivals and Concerts are a great way to generate static income for your next event. Make it easier for attendees to gain access to money which will be spent at your function.

Why an ATM?

- Money withdrawn is almost always spent at the event.
- Many vendors accept cash only which keeps them happy to return next year.
- Attendees are happy because of the convenient access to get cash.
- You as the event will earn surcharge revenue from each withdraw.
- The only cost to you would be the power outlet for the ATM machine.
- MoneyBox ATM does all the work. We monitor and keep the machine filled with cash.

By having MoneyBox ATM at your event, it's hassle-free to you. We monitor each ATM machine with cash levels, refill cash if needed and track all transactions in real time. All you do is sit back and collect revenue from surcharge and increase profits to your event and to your vendors.

MoneyBox ATM machines are located in Iowa, Nevada and Arizona. As many successful clients have learned, providing their customers with an ATM machine ensures that a large portion of the cash that is dispensed is spent at there location. MoneyBox ATM can make that happen.

Whether you have 100 to 100,000 Attendees. We have ATMs for Inside or Outside Events...
